EXCEL introduction.

What EXCEL is.

- EXCEL is a unique learning partnership of major Canadian corporations that are committed to sustainability leadership through continual improvement of environmental and social performance.
- The EXCEL Partnership was founded in 1996 by a group of forward looking corporate leaders, the Globe Foundation of Canada and the Delphi Group. The Partnership was created out of a desire to change the traditionally antagonistic relationship between environmental or social performance and financial expectations. Members come together to develop, integrate and improve sustainability in their corporate strategies, organizations and business models.
- The Globe Foundation and The Delphi Group provide the partnership with facilitation, cutting edge research, analysis and insight into corporate sustainability.
- EXCEL is a member of the World Business Council for Sustainable Development's (WBCSD) Regional Network.

Vision & objectives.

Vision.

EXCEL's vision is to be Canada's most influential and trusted business group focused on corporate sustainability issues: Dedicated to enhancing the competitiveness of our members through a focus on learning and leading on sustainability.

Objectives.

- **Executive Development** – Peer to peer learning and professional development for members
- **Policy and Strategy Engagement** – Government/ENGO/Stakeholder Engagement on Sustainability Issues
- **Platform for Corporate Leadership** – Supporting EXCEL Partners as Canada's leading businesses on Corporate Sustainability through engagement, business-case studies, risk and opportunity research, and cross-cutting issue analysis.

Commitment.

The members of the Partnership are committed to integrating environmental, economical and social performance with our business strategy. Always focusing on continuous improvement and innovation, we learn...together.
